New Silicone Walkway System
October 30, 2020

To: Distributors, Contractors, and Manufacturer's Representatives

Carlisle Roof Foam and Coatings (CRFC) is pleased to introduce its new Safety Yellow Silicone Walkway System. This system includes additions to the SeamlesSEAL™ ULTRA Silicone and Seal-Tek Accessory product lines.

SeamlesSEAL ULTRA Safety Yellow Silicone Coating

SeamlesSEAL ULTRA Safety Yellow Silicone Coating is designed to create a highly visible, durable walkway that is a surface enhancement to the SeamlesSEAL and SeamlesSEAL ULTRA coated roof. It is used in conjunction with Seal-Tek Safety Yellow Granules to create an aesthetically pleasing, non-skid surface. This system can be used to add durability and resistance to high-traffic areas of the roof. The SeamlesSEAL ULTRA Yellow Silicone Coating can enhance rooftop safety by providing perimeter warnings as well as highlighting pipes and other trip hazards.

Seal-Tek Safety Yellow Granules

Seal-Tek Safety Yellow Granules are designed to provide a non-slip surface for walkways, roof access points, and areas where foot traffic is expected. Seal-Tek Safety Yellow Granules are embedded into the SeamlesSEAL ULTRA Safety Yellow Silicone Coating to create a highly visible and durable walking path or perimeter warning. Seal-Tek Safety Yellow Granules are formulated to provide high-performance UV resistance for outdoor applications.

Product Name	Product Code	Packaging	Stocking Locations	Weight
SeamlesSEAL ULTRA Safety Yellow Silicone Coating Pail	340689	5-gal Pail	Adairsville, Carson, Pasadena	57.5 lbs.
Seal-Tek Safety Yellow Granules Pail	340688	2-gal Pail	Adairsville, Carson, Pasadena	25 lbs.

If you have any questions regarding these product updates, please contact your local manufacturer's representative or distributor.

Sincerely,

Bruce Schenke
