MA-CRFC-2022-09

New CRFC Primers and Accessories

January 12, 2021

To: Carlisle Roof Foam and Coatings' Manufacturer's Representatives

Carlisle Roof Foam and Coatings is pleased to announce the addition of several new products to the primers and accessories lines.

Quick Foam Packs Packaged in an easy-to-use, self-contained kit, Quick Foam Packs are a low-pressure, two-component polyurethane foam designed to spray onto flat or irregular surfaces, fill large cavities, and seal any roof penetration, including pipes and units. Compatible with PremiSEAL™ and PremiR® Spray Polyurethane Foams and SeamlessSEAL™ Acrylic and SeamlessSEAL ULTRA Silicone Coatings meets E-84 Class 2(B) Meets ASTM E283 air barrier standards.

Features and Benefits

- Rapid curing allows trimming within 2 to 5 minutes saving time
- Fully cure within 1 hour allows fast coating
- Small and portable package eliminates need to use a spray machine for small repairs

Quick Foam Packs

Prime-Tek Metal Primer is a single-component acrylic primer formulated to resist corrosion of metal substrates and enhance adhesion over steel, aluminum, and galvanized surfaces. It is compatible with all SeamlessSEAL Acrylic and SeamlessSEAL ULTRA Silicone restoration coatings, as well as PremiSEAL and PremiR+ Spray Polyurethane Foams.

Features and Benefits

- Water based makes application and clean up easy
- Water based product meets most local, state, and federal VOC and environmental requirements
- Gray color promotes quick drying and curing reducing wait times
- Effective in blocking bleed through from residual rust
