

# Coating Restoration Training

Carlisle Roof Foam and Coatings (CRFC) is pleased to announce the creation of the new Coating Restoration Training Program, which will be held at the CCM Training & Education Center on the Carlisle, PA, campus.

This two-day class provides attendees with a thorough overview of coating restoration products and application methods. This course is designed for both new and experienced CRFC approved applicators who are interested in increasing their coating knowledge. The class takes applicators through every stage of applying a coating restoration system and features topics such as roof substrates and evaluation, preparation and repair, application methods, and the warranty inspection process. With plenty of hands-on training to supplement the classroom portions, applicators will leave the class with the experience and resources to complete a warranted coating restoration system.
