

New Prime-Tek Bleed Block Plus Primer

Carlisle Roof Foam and Coatings (CRFC) is pleased to introduce **Prime-Tek Bleed Block Plus Primer** to our portfolio of products. Prime-Tek Bleed Block Plus Primer is a water-based, one-part primer that blocks bleed-through from modified bitumen and other asphaltic substrates. Prime-Tek Bleed Block Plus Primer enhances coating adhesion and has low VOC levels. This product dries quickly and has excellent resistance to heat, cold, moisture, and weathering.

Features and Benefits

- Single-component water-based formulation
- Designed for use over modified bitumen, BUR, and other asphaltic substrates
- Compatible with a variety of porous and non-porous substrates
- Easily applied with airless spray equipment, roller, or brush
- Cures to form a tack-free coating in 2-6 hrs.
- Low VOC levels allow for application in most regulated areas
- Non-flammable
- Coverage rates of 100 – 200 sqft per gallon
- Available in 5-gallon and 55-gallon containers

Prime-Tek Bleed Block Plus Primer will be available starting May 15th, 2020 and is the preferred primer for all asphaltic based substrates. For additional information, contact your local sales representative or visit www.CarlisleRFC.com.

CRFC's original product, Prime-Tek Bleed Block Primer, will be phased out and only available while supply lasts.

Sincerely,

Bruce Schenke
